## SPARTA 37 Brushcutter SPARTA 42 Brushcutter

The new Sparta 37 - 42 brushcutters are designed to offer **high efficiency** and **unfaltering quality** over time, even in the face of **heavy and prolonged use**. The new professional 2-stroke engine complies with **EURO I standards**, ensuring economical fuel consumption and low emissions while delivering stable power and torque under any operating conditions. The machine incorporates numerous features ensuring top performance and reliability combined with user comfort.

**Sparta 37 - 42** are the ideal machines for tough jobs like **cutting thick grass, clearing brushwood, and thinning reed beds**. Every detail has been designed with care to render brushcutting duties easy and effortless, even for the inexperienced user.

The pluses are:

- excellent **versatility** in operation;
- **high performance**, for maximum productivity;
- **accuracy of cut**, avoiding damage to vegetation around the work area and obtaining best possible results;
- **total comfort**, with muscle fatigue minimized both when starting the machine and during prolonged use, by maintaining an ergonomically correct posture;
- **ease of use**, allowing even comparative novices to operate the equipment ultra-simply and in complete safety;
- **low fuel consumption and low emissions**, for minimal environmental impact.

The new models are designed with **numerous solutions that will simplify cleaning and routine maintenance operations**, like the one-piece engine and silencer cowl, the snap-fit filter cover, and the cloth filter element. The new design features a longer drive shaft, an antivibration system (using 5 flexible bushings along the shaft and a central component located between the clamps and the aluminium housing), double harness and optimum weight distribution, all combining to lighten the workload, whilst the operator has control over the machine and can assume an **ergonomically correct and safe posture**.

	SPARTA 37 S	SPARTA 37	SPARTA 42 S	SPARTA 42
Power/Displacement	1.8 HP - 1.3 kW / 36.3 cm <sup>3</sup>		2.1 HP - 1.6 kW / 40.2 cm <sup>3</sup>
