

## Fits All Triplex Greens Mowers

**True-Surface** attachments are the ultimate in greens care. From the patented vibrating greens roller which shakes in topdressing, to the vacuuming cutter which removes up to 20 times more material than standard verticutters, True-Surface attachments will take your greens to the next level.

What's more, changing over attachments is quick and easy with no tools required.

And even better, all cassettes fit all triplex greens mowers' stainless steel units enabling full use of otherwise idle machines.

The only exception is the Vibratory Greens Roller attachment which comes with its own special vibrating unit. Units are also available in both red and green to match your greens mower.

### Superior green speed & health: **True-Surface Vibe V™ Vibratory Greens Roller**

More than just a rolling unit, the Vibratory Greens Roller is used to shake in topdressing sand, remove morning dew, smooth greens after coring and make achieving fast, consistent greens a cinch.

**New Greens:** Gently firm newly seeded & turfed greens to bring them into play sooner

**Regular Rolling:** Keep your greens fast & true by lightly rolling them 3 times a week

**Vibrating-In-Topdressing:** Get 45% more topdressing into the canopy, and be able to choose the level of vibration according to sand quality

**True Greens After Aeration:** Quickly restore a smooth surface after vertidrainage and aeration

**Tournament Rolling:** For optimum speed and true ball roll, or to remove dew

### Cut & vacuum at the same time: **True-Surface Vacu-Cutter™ (45 Blades)**

The Vacu-Cutter cassette will remove and vacuum up to 20 times more material than standard verticutters. Its vacuum-power system shoots the material directly into the grass basket without additional clean-up.

**Usual Working Depth:** 0-1/8" (0-3mm)

**Maximum Working Depth:** 1/4" (6mm)

**Blade Spacing:** 3/8" (10mm)

**Blade Type:** Stainless steel with eleven tungsten carbide tips

### Stand your grass up before mowing: **True-Surface Vacu-Groomer™**

Use the Vacu-Groomer to stand your grass up prior to mowing to provide a nice even cut. Additionally, this cassette is an effective tool to remove seedheads.

**Usual Working Depth:** 0-3/32" (0-2mm)

**Maximum Working Depth:** 3/32" (2mm)

**Blade Spacing:** 3/8" (10mm)

**Blade Type:** Stainless steel with 2 tungsten carbide tips. Blade tips are offset so they can cut at 1/4" (5mm)

### Open the surface & remove thatch: *True-Surface Vacu-Scarifier™*

Use the Vacu-Scarifier as a supplement to regular use of the Vacu-Cutter™ cassette. It removes large amounts of thatch and opens the surface for aeration and topdressing entry.

**Usual Working Depth:** 5/16 - 3/8" (8-10mm)

**Maximum Working Depth:** 3/8" (10mm)

**Blade Spacing:** 1 1/2" (40mm)

**Blade Type:** Stainless steel with 5 tungsten carbide tips

### Allow the green to breathe: *True-Surface Greens Spiker™*

The Greens Spiker will penetrate through your green's surface to allow air and water entry. You are able to prep your greens for overseeding with 2 or 3 passes. The Spiker is also a great tool for venting during high humidity months and draining standing water during wetter months.

**Usual Working Depth:** 3/4" (20mm)

**Maximum Working Depth:** 1/2-1" (25mm) if ground conditions are soft enough

**Spike Spacing:** 2 3/8" (60mm) giving 344 holes per square yard (400 holes per square meter)

**Spike Type:** Hardened steel spikes 1 1/4" long

### Surface aeration without play disruption: *True-Surface Star Slitter™*

Use the Star Slitter cassette for a fast way to aerate the surface of the green without disrupting it. The surface is left smooth and ready for play.

**Usual Working Depth:** 1/2 - 3/4" (13-20mm)

**Maximum Working Depth:** 3/4" (20mm)

**Blade Spacing:** 1 1/2" (40mm)

**Blade Type:** 7 point spring steel blade

### Get deep aeration & stimulate growth: *True-Surface Deep Slicer™*

Use the Deep Slicer to create deep continuous slits in the green to allow gas exchange and stimulate root growth. The blades are designed to remove no material and leave the surface immediately ready for play.

**Usual Working Depth:** 3/4" (20mm)

**Maximum Working Depth:** 3/4" (20mm)

**Blade Spacing:** 1 1/2" (40mm)

**Blade Type:** Round cornered triangular blades with sharpened edges .03" (.7mm) thick

### Groom and collect debris: *True-Surface Vacu-Brush™ (Soft & Firm)*

Use the soft brush to remove dew, surface debris and worm castings. Use the firm brush to groom, collect large debris and remove Poa Annua seeds along with excess topdressing. You can also take off your grass basket and use the brush to work topdressing into the canopy.

**Usual Working Depth:** Zero

**Height Setting:** Bristle tips should just lightly skim the top of the turf

**Bristle Types:** Black/Soft & Blue/Firm
