

TORO PROLINE 60V

ELECTRIC COMMERCIAL MOWER

Engineered for contractor-grade performance with zero emissions. Quiet, durable, and easy to use - this mower gives you the quality of cut your customers demand.

The aluminium deck is built-to-last and with tough jobs in mind, featuring Toro's Recycler technology, whereby the clippings are lifted, suspended and re-cut into a fine mulch that degrades down into the surface of the lawn.

As a self-propelled model, the electric motor takes the strain away from you, thanks to the fixed operating speed.

- 21 inch cutting deck (53 cm)
- Emission Free
- Superior Quality of Cut
- Maintenance Free
- Durable Deck

Specifications:

Model: 22275
