

GRILLO AGRIGARDEN MACHINES

Ever since Grillo was founded in Italy in 1953, it has been producing quality machines for agriculture and turf maintenance. Grillo prides itself on its advanced technical solutions, quality, reliability and comfort. It has created a phenomenal range of climber mowers, commercial ride-ons, trimmer mowers, walking tractors, rotary hoes and tillers. All products are made suitable for both professional and domestic use, and are ideal for New Zealand terrain.

RIDE ON MOWERS

Grillo has an impressive range of ride-on mowers that perform in the tough mowing conditions common to New Zealand landscapes.

FRONT-DECK SERIES

The Front Deck Series is affordable, easy to operate and creates a high-quality finish. Other models are available on special order, please enquire with our team today!

FD 280

With a floating 46" front collection deck, a large 280-litre collection and electric bin grass discharge the FD280 is highly productive, and fast and leaves a beautiful finish on lawns. Ideal for large properties where leaves are a problem or where it's slippery underfoot. The out-front floating deck allows the operator to mow into corners, under bushes and trees and offers excellent visibility. Because the deck follows the contours of the land, the mower produces a quality finish.

CLIMBER SERIES

The Climber Series is built to handle tough terrain and is renowned for safety, stability and performance on slopes and tall grass.

Climber 7.15

The Climber 7.15 is generally best used on properties around 1 - 2 acres, or where the terrain underfoot is smoother and therefore the machine can be a lighter build.

- Tackles long grass, saplings and bracken with ease
- Great for slopes or undulating terrain
- Extreme maneuverability
- Simple and easy to operate

parkland.co.nz/shop/climber-ride-on-mower-7-15

Climber 7.18

The Climber 7.18 is generally best used on smaller properties up to 3 - 4 acres. With plenty of engine power, travelling up and down steep slopes is easy even while mowing long grass.

- Ultimate safety which minimises risk
- Tackles tricky, hard-to-reach spots
- Gets the job done - fast!

parkland.co.nz/shop/climber-ride-on-mower-7-18

Climber 9.18

Generally used in demanding applications where 4WD-like performance is required and on properties around 3 - 5 acres. Designed for challenging conditions this machine is ideal for properties where the grass is mowed infrequently.

- Ergonomic driver features included
- Adjustable seat
- Manages heavy terrain well
- Powerful V-Twin engine

parkland.co.nz/shop/climber-ride-on-mower-9-18

Climber 9.22

This machine can go anywhere and mow anything. It's ideal for applications that include regularly tackling challenging conditions, for owners who only have irregular opportunities to mow.

- Tackles overgrown, neglected areas with ease
- Easy-to-use rapid, efficient mower
- Simple to clean, easy to maintain
- Stay safe on sloping areas

parkland.co.nz/shop/climber-ride-on-mower-9-22

CLIMBER SERIES (continued)

Climber MD22N

The MD 22N is a hydrostatic mower with dual functions. It has a 3-blade 110 cm cutter deck, fitted with a “quick-shift” lever to change between rear discharge or mulch which can be directly operated from the driver’s seat. It is recommended for steep lawns, in the private or professional sector. The MD 22N has the same ground-hugging characteristics as a Climber series, but unlike the Climber range MD22N is not designed to mow scrub, or very long grass.

- Recommended for slopes, operates well in tough conditions
- Achieve a clean park-like finish
- Quick change lever makes mulching or removing discharge easy
- Adjustable cutting height (2.5 - 11cm)

parkland.co.nz/shop/climber-ride-on-mower-md22

Climber 10.22 AWD

The powerful Climber 10.22 AWD is designed for mowing applications that are more demanding and where it’s rough underfoot. You may have larger areas and longer grass that a normal ride-on mower can’t handle.

- Built for slopes
- Remarkably efficient on high grass and up to 2.5 cm thick shrubs
- Ultimate operator comfort and control
- Superior traction on challenging surfaces
- Adjustable cutting height
- Robust and long-lasting
- Maximum safety, reliability and stability

parkland.co.nz/shop/climber-10-awd-22hp

Climber 10.27 AWD

The Climber 10.27 is an All Wheel Drive (AWD) machine but provides maximum maneuverability. Its small turning circle of only 70cm is the best in its class. It also features a differential lock which provides superior traction, allowing the user to manage any tricky areas by depressing the diff lock pedal to engage both rear wheels simultaneously.

- Extremely low center of gravity
- Balanced weight distribution to provide maximum stability
- Hydrostatic transmission
- Ergonomically designed Grammer suspension seat with arm rests and seat belt
- Foldable roll bar fitted
- Tow bar and twin LED headlights fitted as standard

ZERO TURN MOWERS

FX27

The Grillo FX27 is a professional ZTR mower perfect for large properties where there are wide, open spaces maybe with trees and bushes to mow underneath. Tackles long grass, saplings and bracken with ease

The out-front floating deck allows the operator to mow into corners, under bushes and trees and offers excellent visibility due to the cutting deck being in front of the operator. Because the deck follows the contours of the land, adapting itself to uneven surfaces to avoid scalping, the mower produces a quality finish.

FX27 has unique features that differentiate this machine from other mid-mount ZTR mowers. Comfort, stability, ease of use and practical deck features set this machine apart from other run-of-the-mill ZTR mowers.

Due to its out-front position, the deck can be lifted up and down electrically by depressing a switch - no manual back-breaking lifting! You no longer have to drive the machine up ramps to be able to get to the underside of the deck. Once work is finished the deck can be electrically lifted to allow cleaning, blade sharpening or other maintenance.

ROTAVATORS

Grillo rotavators are used for tilling even very hard and stony soil to a considerable depth. The user can adjust the tilling depth by putting more or less pressure on the spur and adjusting its height.

The side discs are necessary to balance the machine and to mark out the tilled area. When working on softer soil, the side discs are recommended to prevent the tilled soil from covering the new plants and damaging their roots. On soft soil, the side discs ensure good flotation and allow the machine to move forward easily without sinking.

Princess M1 & MR Rotary Tillers

- Extremely quiet with muffler guard
- Easy pull start
- Handlebar grip made of anti-vibrating material
- Hoe width is adjustable up to 800mm
- Adjustable tilling depth, cuts out to 80 cm
- Suits previously turned over ground
- Gear housing in press-formed plate sections secured by bolts
- Kevlar Belts (high performance)
- Suitable for previously tilled soil, and gardens
- M1: one forward gear
- MR: one forward and reverse gear

Princess MP3 PRO Rotary Tiller

Grillo rotavator Princess MP3 PRO brings together the advantages and the maneuverability of the machines with a belt-to-chain transmission and the efficiency and robustness of the tiller with hexagonal shaft of professional motor-hoes.

This machine is practical and easily transported.

Featuring:

- Adjustable tilling depth
- Handlebar height and side position adjustable
- Belt-to-chain transmission
- Two forward gears and one reverse gear
- Composed of 6 tine elements with side discs – steel tines are removable & 33 cm in diameter.

WALKING TRACTORS

Walking tractors are versatile working tools in agriculture and gardening. They are mainly used for soil tilling, and in combination with the series of available attachments, these machines can be used to carry out a number of different jobs:

- Spring: used to finely till the soil to prepare it for sowing.
- Summer: used to till the ground between the rows makes the ground soft and free from weeds; this ensures the penetration of water and moisture into the soil.
- Autumn: it is important to till the cultivated area in order to cut and to till under the remaining plants. This will give way to the rearrangement of a compost that lets the plants decompose into the soil adding therefore organic nourishment ready to be used the following spring.
- Winter: Grillo offers snow throwers, snow blades and snow brushes to set streets and avenues free from ice and snow.

All Grillo walking tractors are equipped with oil bath gears and bearings. The wheels' motion is independent of the P.T.O. to which you connect the attachments; this simplifies the transport and makes the Grillo walking tractor a safe and easy-to-use machine. The rotary tiller unit consists of 4/6 sets of hoes made of steel that succeed in finely cutting the soil with 20 rotations per wheel revolution. The cowling tiller is made of sheet metal, in compliance with the extremely rigid EU-Norms, and its width is adjustable following the number of hoes you intend to use.

G45 Rotary Hoe

The Grillo G45 is a compact walking tractor, ideal for working in narrow spaces both in horticulture or gardens. Perfectly balanced, it is fitted with a two-speed gearbox with gears in oil bath and a forward and a reverse gear.

The counter-rotating tines till even the hardest soil in spite of its reduced sizes and lightweight. The tines and wheels move in opposite direction allowing the walking tractor to perfectly adhere to the ground enabling the user to work with minimum effort.

- 50 cm tilling width
- Adjustable handles with anti-vibration

parkland.co.nz/shop/g45-rotary-hoe

WALKING TRACTORS

G46 Rotary Hoe / Walking Tractor

Grillo G 46 is an innovative machine, ideal for horticulture and gardening. Thanks to its compact dimensions, it works easily in narrow spaces.

- 50 cm tiller width
- Tempered steel tines (26 cm)
- Honda GX200 petrol engine, that is fitted with a robust engine guard
- Oil-bath gearbox
- Side and height-adjustable handlebar
- Forward gear and PTO are engaged independently from each other
- Active coupling
- Quick gear-inverter via lever
- Maximum operator's safety

parkland.co.nz/shop/rotary-hoe-walking-tractor-g46

G55 Rotary Hoe / Walking Tractor

The Grillo G55 is a heavy duty domestic or entry level commercial rotary hoe. The handle bars can be reversed in order to carry multiple attachments such as a sickle bar and mower. With 5.0 hp, two gears, and larger tractor wheels the G55 can handle applications that require more power. It comes with quick coupler to enable faster swapping over of attachments.

A popular attachment often purchased with G55 is the adjustable furrower for mounding up potatoes or kumara. A mounting frame is required when this furrower is used.

parkland.co.nz/shop/g55-rotary-hoe-walk-behind-tractor

G84 Rotary Hoe / Walking Tractor

Grillo G84 is a heavy-duty domestic (or entry-level commercial) rotary hoe/walking tractor, ideal for gardening, horticulture, orchards and vegetable plots. It is a robust machine ideal to work on any kind of soil.

G84 is powered by a Honda 5.5 and fitted with a 4 speed-gearbox in oil-bath, with 2 forward + 2 reverse gears.

Some of the optional attachments that can be used are the same as the smaller G55 model – making G84 a popular machine that suits more powerful applications.

TRIMMERS

The Grillo HWT product range fitted with large sized wheels, meets the needs of both particular clients and contractors, who deal with various maintenance operations in gardens and trees, walls and obstacles, rough areas, kerbsides, close to flowerbeds.

The Grillo Trimmer models are entirely manufactured in Grillo's premises in Italy by using high quality materials and very latest technology to ensure quality built machines.

HWT 570 Multiforce

The HWT 570 Multiforce is a handy and easy-to-drive string trimmer, suitable for trimming where standard mowers do not reach. It can also be used as a lawnmower for small, flat plots of land. The drive belt between the engine and the cutting rotor is high-strength for long service life.

The machine is supplied with a side steel grass deflector that prevents residues from being thrown onto the road or driveway.

Standard equipment includes a transparent screen to protect the engine and a rubber guard between the wheels to ensure maximum protection of the operator from grass cuttings and possible objects being thrown. The large wheels allow agile and manoeuvrable operation close to obstacles.

parkland.co.nz/shop/hwt-570-multiforce

HWT 700 SUPERTRAC

The HWT 700 Supertrac by Grillo is one of the most superior performing trimmer mowers around. It's the ideal machine for maintaining rough areas, such as high grass, steep slopes and hard-to-reach areas. It is popular with contractors and property owners for taking care of tough undergrowth, rural driveways, vineyards and any areas that a normal mower cannot reach. Highly maneuverable, the self-drive wheels and brakes allow the machine to easily carry out finishing work around trees and other obstacles.

- Kawasaki FJ180V KAI engine
- Adjustable cutting height
- Self-propelled
- Performs on slopes up to 30 degrees
- Highly maneuverable and safe to operate
- Abundant power to cut grass, small bushes and unkempt areas in any weather conditions
