VENTRAC

THE VENTRAC 4520

Through Ventrac's advanced engineering and design efforts, the best mix of machine performance, operator experience, and durability has come together in the new 4520 tractor. Ventrac has become a top choice for versatility for ground's care professionals. Combining the perfect blend of peak power and agility with front-mounted attachments for superior visibility.

QUICK CONNECT ATTACHMENTS

Out-front attachments provide you better visibility, safety, and control

FLEXFRAME

Maneuver with tighter turns, more stability, & better ground contact

WEIGHT TRANSFER

Shifts the load to increase stability and provide traction when you need it most

ALL-WHEEL DRIVE

For superior traction in all situations

EFFORTLESS STEERING & CONTROLS

Intuitive controls help you become one with the machine

LIGHT FOOTPRINT

Allows you to operate on soft ground with minimal impact

ALL SEASON PERFORMANCE

No matter the weather or job, this tractor is ready to get it done

LOW PROFILE DESIGN

For optimized stability and performance handling

ELEVATE. THE NEXT LEVEL.

MASTER OF ANY TERRAIN

FLEXFRAME

The majority of compact tractors have followed the structure of traditional agricultural tractors with a straight frame design. Unfortunately, this old-fashioned design was not for machines that needed to **adapt to uneven and wet terrain**. In contrast, the Ventrac 4520 is built with FlexFrame, allowing the tractor to articulate and oscillate. Ventrac's FlexFrame allows the machine to crawl over terrain no matter how it changes, allowing **more stability and capability** to work on surfaces that aren't perfectly flat.

POWERFUL FLEXIBILITY

- Smoother Ride for Operator
- Increased Stability on Slopes
- Better Ground Contact
- Matching Wheel Path
- Tighter Turning Radius

LIGHT FOOTPRINT

One of the most significant benefits of Ventrac's FlexFrame design is the machine's light footprint, which can be maximized with the addition of dual wheels. Even on the most delicate turf, its ability to operate in wet conditions makes its performance in less-than-perfect conditions **unmatched by any other equipment**. Ventrac's all-wheel drive and flotation tires help the tractor move across the turf without creating ruts or tearing out the grass by its roots. In addition, the oscillating FlexFrame keeps all four tires in contact with the ground, spreading out the weight of the tractor and minimizing its impact on the wet ground.

GENTLE ON TURF

- Dual Wheels for Better Weight Distribution
- Minimized Impact on Turf
- Operate on Soft Ground Conditions

FLEXFRAME

ADVANTAGE ON SLOPES

DESIGNED FOR SLOPES

Ventrac's slope capabilities will elevate your operational experience to the next level. With a unique blend of features that no other machine can offer, Ventrac provides **exceptional stability and control** on slopes.

Combining the FlexFrame design, all-wheel-drive, and dual wheels allows the tractor to hug the turf for better traction and stability on slopes up to 30 degrees with confidence.

- Full-Time Contact with the Ground
- Wide Stance for Exceptional Stability
- Mow Slopes up to 30 degrees

⚠ DANGER

ELITE SIDEWALK SNOW REMOVAL

SIZED FOR SIDEWALKS

The snow removal industry can be competitive, and contractors must perform at the highest level to flourish. Ventrac's full line of snow and ice management equipment provides contractors with the edge they need to compete.

The FlexFrame design allows for **better maneuverability** in tight spaces and smaller areas plus has the added benefit to navigate curbs up to 8 inches.

Contractors save labor and time while performing more efficiently when multi-tasking with the 4520. Eliminate sidewalk shoveling and separate salt applications by combining an attachment on the front and a deicer on the back for a one-pass process, saving time and labor.

For every intensity of snow event, Ventrac has you covered with the ideal attachment. Brooms handle light snows with ease, snow blowers for heavy removal, and blades for everything in between. To enhance the operator's experience, staying warm and dry is achieved with the addition of a heated cab.

Ventrac's compact size and its one-pass process results in the **perfect match for tackling sidewalk snow**.

VERSATILITY IN MOWING

EXPAND YOUR MOWING CAPABILITIES

Ventrac's full arsenal of mower decks offers **every mowing option you need** for efficiency, quality of cut, and precision to maintain everything from wild brush to professional league sports turf. Within this extensive line of mowers, each offers world-class performance and capabilities.

Features include single-lever height adjustments, full-length rear rollers, high-strength steel deck construction, and industrial components.

An optional hydraulic flip-up and mulch kit add convenience and versatility to this lineup.

VENTRAC STRIPES - SUBMITTED BY JAMES SUMNICK

VERSATILITY FOR CONTRACTORS

Pete Denny is the owner of GCI Turf Services in Greensboro, North Carolina. Pete is all about efficiency, ease of work, and long-lasting, quality-made equipment. He is a self-proclaimed 'Equipment Junkie' and doesn't mind investing in good equipment.

Pete's lawn business has expanded since adding Ventrac, and he can now offer more services. His business used to be fertilizer, weed control, and mowing, but his investment in Ventrac has **added specialized revenue streams**. He is now taking on jobs such as reconditioning gravel driveways, brush mowing, and even trenching.

DURING THE WINTER SEASON, when there is less mowing, he takes on gravel driveway restoration projects that involve re-crowning, smoothing, and fixing potholes. He can save his clients from purchasing new gravel by bringing old gravel to the surface for a fresh finish.

PETE'S FAVORITE ATTACHMENT for his Ventrac is the Tough Cut with dual wheels because he feels unstoppable. He can now cut overgrown areas that were previously defined as un-mowable.

He offers slope mowing on hills up to 30 degrees and cuts through tall brush and small saplings for his clients.

THE INCREDIBLY VERSATILE NATURE of the 4520 and attachments means that Pete has invested in something to **take his business to the next level**, and he wants to keep going - power raking, tough cutting, trenching, and mowing all in one day.

“I'm all about efficiency, ease-of-work, and something that's going to last a long time. I've bought multiple attachments for the tractor. We're able to offer so many more services now.”

- Pete Denny, NC Landscape Contractor
Pete Denny is a Ventrac Sponsored Advocate.

PROFESSIONAL GROUNDS CARE

In demand of professional grounds care, safety, reliability, and productivity, you'll get an excellent quality maintenance solution through Toro's ground care equipment.

For those requiring large equipment, reliability, or multiple grounds care applications, our equipment lines offer your exact performance requirements. Always featuring maintenance-free engines.

Investment in Toro's quality equipment is the only way you can get the most out of your grounds care equipment. Our equipment lines offer a wide range of solutions for your grounds care needs. From our Toro's maintenance-free engines to our Toro's maintenance-free engines, Toro's equipment is the only way you can get the most out of your grounds care equipment.

When I'm in the morning, some people, getting through early, recognizing the potential of the day.

Managing the growth of the organization, being able to see the potential, the vision, the future, the growth, the expansion, the development, the progress, the success, the achievement, the accomplishment, the fulfillment, the realization, the attainment, the completion, the conclusion, the end, the finality, the closure, the resolution, the settlement, the agreement, the understanding, the comprehension, the perception, the cognition, the recognition, the acknowledgment, the appreciation, the gratitude, the thankfulness, the appreciation, the gratitude, the thankfulness, the appreciation, the gratitude, the thankfulness.

It amazes me that I walk on different college campuses, and they're using something else other than a Ventrac. I think to myself, "Wow, I just couldn't imagine doing our job without it."

— Beau Hirstine
Director of Grounds, College of Wooster

VERSATILITY FOR GOLF

SAFETY, QUALITY, CAPABILITY.

Workplaces that require the highest safety standards are looking for the most advanced equipment available. The Toro Company is proud to provide a line of equipment that is designed for these professionals.

Toro's professional equipment is designed for the highest quality of work. Our equipment is built to last, and our equipment is built to last.

With a long history of providing the highest quality of work, we have a proven track record of providing the highest quality of work. Our equipment is built to last, and our equipment is built to last.

Toro's professional equipment is designed for the highest quality of work. Our equipment is built to last, and our equipment is built to last.
